The Anathomie of Mans body, as the  
parts thereof are governed by the  
twelve Celestiall  
Signes.

Aries, Head and Face.

Taurus,  
Neck and  
Throate.

Cancer,  
Brest and  
Stomacke.

Virgo,  
Bowels  
and belly.

Scorpio,  
Secret &  
members

Capricor,  
the knees

Gemini,  
Armes &  
Shoulders

Leo,  
Heart and  
liver.

Libra,  
Reynes  
& loynes.

Sagittarius  
The  
Thighes

Aquarius,  
The legs

Pisces, The feet.

The fierie *Ram* he ruleth Head and Face.  
In Necke and Throat the *Bull* doth challenge place;  
The ayrie *Twins*, they governe Armes and Hands,  
The Brest and Stomacke *Cancer* she commands:  
The lustie *Lion* hath the Backe and Heart,  
Bowels and Belly is the *Virgins* part:  
In Loynes and Reynes is *Libraes* liberties,  
And *Scorpio* rules the Stones and Priuities:  
The Thighes and Haunch is *Sagittarius* song,  
And both the Knees to *Capricorne* belong:  
*Aquarius* makes the Legs much aches feeble,  
And *Pisces* rules the Feet from Toe to Heele.

Januarie hath xxxj. dayes.

White. 1630.

A Prognostication for  
this yeare of our Lord God,

1630.

Being the second after the *Bissextile*, or  
Leape-yeare:

VVherein is conteyned the state  
*of the whole Yeare; the disposition of*  
each Quarter; and the Inclinati-  
on of the Weather for euery Quar-  
ter of the Moone through-  
out the whole Yeare.

With the rising and setting of the Planets,  
Husbandry Aduertisements, and other  
*things fit to bee knowne, both plea-  
sant and profitable.*

Also, at the end of the Booke, is the whole  
*Almanacke, conteyned in one Lease, for this*  
Yeare 1630. which being cut out, is fit to be  
placed into a Table-Booke, Booke  
of Accompt, or other.

By, *Iohn White*, Well-willer to the *Mathematicks*.

# A briefe Declaration of the Disposition of the foure Quar- ters of this Yeare.

## And first of Winter.

*The Winter Quarter best doth prophesie  
To all Degrees, and Sexes, their estate.*

Sol in Capricorne, Aquarius, Pisces.

Winter (being the first Astronomickall Quarter) doth begin when the Sunne doth first enter into the first degree of the Hiemall or earthly Signe Capricorne, which was the last Yeare 1629. upon Friday the xi. day of December, and doth continue till Wednesday, being the tenth day of March this yeare 1630. In which time, the Sunne maketh his way through these three Winterly Signes, Capricorne, Aquarius, and Pisces.

This Quarter (of naturall condition) is cold and moist, contrary to the Summer, being of the Melanchollicke Complexion, which Element hath most government (in the Bodies of all sensible Creatures) from three of the clock in the afternoone, till nine of the clock at night. Now is it the most dangerous and tempestuous time for the painefull Mariner, who encountereth many a storme on the raging Ocean, the Windes are high and strong, making the billowes of the Seas to swell and come: The Floods are very high, the Ayre is cold and piercing, the daies are short, the nights long, and the vigour of every Creature decayeth: The pores of the Earth are closed and shut up, by the extreame coldnesse of the Ayre: Fowles get them to the warmest Regions, Beastes seeke for a shelter, Serpents betake them to their denues, and the Fishes get into the deepest of the Waters for their warmth and comfort: And looks whatsoever the cheerefull Spring and comfortable Sommer doth produce and nourish, this Quarter doth destroy and vanish. The coldest

## A Prognostication.

and by the Winter is, the more wholesome it is for Man and Beast; yet too much cold killeth Plants and Trees in a warme Climate: A moyst and warme Winter is an enemy to nature, but a friend to husbandry, and indifferent Rize of Snow doth rauen the Earth and preserueth Corne. For the preseruatiō of our healthes, it is fit that we should now vse such meates whose operation are of a hotte and dry qualitie, expelling the cold and unwholesome ayre, with good fires, warme Broaches, comfortable Drinckes, and strong Wines; And be carefull to keepe the head and feet from cold and wet: Yet can the body digest more grosse and strong meates then in Sommer, by reason that naturall heate is dimmed (by the coldnesse of the ayre) into the inward parts of the Body, to comfort the vitall Spirits, and to helpe digestion.

The usuall Sickneses of this Quarter, are these (or the like) as Coughes, Poles, Palles, Gouttes, sore Eyes, Rheumes, Tooth-ach, Cramps, Catarrhs, Strickes, Fluxes, &c.

## The Second part of the Yeare called the Spring.

*The Spring compared is to Infancy,  
To spring and grow in Vertue till we dye.*

Sol in Aries, Taurus, Gemini.

**T**he pleasant and comfortable Spring beginneth when the glorious Sunne entereth into the first degree of the Vernal Signe Aries, (being the first Equinoctiall) which is on Wednesday the tenth day of March, and doth continue till Friday, being the eleventh day of June; In which space of time, the Sun passeth through these three Signes, Aries, Taurus, Gemini.

The naturall quality of this Quarter is to be hot and moyst, participating of the Sanguine Complexion, which Element hath chiefe government from nine of the clock at night, till three of the clock in the morning: Now are the daies and nights of an equall length, and the resplendant Sunne seemes to smile vpon the face of the new recovered Earth, causing it to produce all kind of varieties to all our Senses: This of all the Quarters

of the yeare is the most pleasant and holesome, it being the most convenient time to remooue diseases of a long continuance, and to prevent those which are like to ensue: Now doe the Birds of the ayre couple and breed, Beasts of the earth encrease, and the Fishes of the waters doe multiply in abundance, forsaking the deepe to liue in moze shallowe places: And now the Earth bringeth forth all sorts of Flowers, Herbs, Fruits, and Plants, for the needfull vse of Man and Beast. An euer wet Spring increaseth weeds, causing Fruits to be carcase and rotten: It is fitting for the preservation of our healths, that we now vse such Meates as are of a cold and dry quality; and let your Drinckes be moze coole and small then in winter: It is now a fit time to Purge, Bathe, Bleed, and Sweat, if necessity vrgē.

The diseases incident to this Quarter, are Small-poxes, Measles, Scabbies, Pusshes in the face, Agues, Phrenies, Kings euill, &c.

---

Of the third part of the Yeare,  
called Summer.

*Like Man in his chiefe state and lusty yeares,  
The ripening Summer Quarter best appears.*

Sol in Cancer, Leo, Virgo.

Summer Quarter beghineth when the ripening Sunne entereth into the first and highest degree of the northern Tropique Cancer, which is vpon Friday, being the eleventh day of June, and doth continue till Monday, being the thirteenth day of September, in which time he maketh his progression through these three Solsticiall Signes, Cancer, Leo, and Virgo.

The usuall qualittie of this Quarter is to be hot and dry, taking part of the Cholerick Complexion, which Element hath chiefe predominacion from thye of the clock in the morning, till nine in the forenoone. Now is the Sunne at the highest, causing the dayes to be at the longest, and the nights to be short: It heate is now at the highest, Floods at the lowest, Seas most quicrest, and the winds most calmest: And now is the fruitfull Earth clothed in her richest embrodery, imparting of her store to all

## A Prognostication.

sensible Creatures for their life and comfort: Flowers are in their beames, and Fruits in their delicacie; and the painfull Bees gathereth their hunny for their future sustenance: Now naturall heat is dispersed abroad vnto the outward parts of the body, and Winter is not so hot within as in winter, neither can he digest such gross and strong Meates as then: yet the most small and coole Dishes are most convenient for our healths, and little Roast Meates best suffice nature, and those which are boyled is most wholesome, and vnto such things as are of a cold and moist qualitie: An ouer wet Sommer rotteth Fruits, and becometh Cane.

The ordinary Infirmities of this Quarter, are Feuers, Pestilence, Iudies, Agues, paine of the Head and Belly, &c.

### Of the fourth part of the Yeere, called Autumne or Haruest.

*As Autumne steales the lappe from Tree and Flower,  
So Death comes creeping neerer euery houre.*

Sol in Libra, Scorpio, Sagitari.

**A**utumne. (commonly called the Fall of the Leaf) doth begin on Monday the xiii. day of September, when the Sun doth enter into the first degree of the second Equinoctiall Signe Libra, and doth continue till Sunday being the xii. day of December; in which time the Sunne passeth through these three Autumnall Signes, Libra, Scorpio, and Sagitari.

The usuall qualitie of this Quarter is to be cold and dry, taking the greatest part of the Melancholy & complexion. which Element hath most government from nine of the clock in the morning till thre in the afternoone. The daies are now againe equally ballanced with the nights; the Grass is mowed, Cows reaped. Fruits are gathered, and the painfull Husbandman reapeth the profite of his future labours: Now both the Earth looses the beauty of her former glory, Flowers fade, Leaves doe fall, Floods increaseth, and all Creatures loose their strength and vigour, and the most part of sensible Creatures seek for shelter against the storme ensuing winter: Of all other Quarters

ters of the yeare this is the most unwholsome, breeding diseases of divers kinds in our bodie; therefore beware of the morning and evening cold, and use such things as are of a hot and moist quality: It is now a time (if need require) to Purge, Bath, and Bleed: An Autumn overwet putteth Grapes, making bad Wines, and scarcity of Fruit.

The Sickneses commonly attending this Quarter are many, as these, or the like, the Stone, paine in the Backe and Kidnies, sore Eyes, Melancholy, Falling Sickness, Agues, Fluxes of Blood, Fistuloes, Splene, Emroids, &c.

# The Rising and Setting of the Planets, with the disposition of the Weather, for every Quarter of the Moone for this Yeare, 1630.

## January.

♄ Saturne is South at Sunne rising.

♃ Jupiter, and ♀ Mercuri are neere the Sunne.

♂ Mars, is in the south about midnight.

♀ Venus is our bright Morning-star.

New Moone on Sunday the iii. day, at ix. the clocke in the morning, frost.

First Quarter on Monday the xi. day, 27 min. after one of the clocke afternoone, faire.

Full Moone on Monday the xviii. day, halfe an hower after two of the clocke in the afternoone, frost.

Last Quarter on Monday the xxv. day, 34. minutes after five of the clocke in the morning, wet.

## February.

♄ Saturne is creeping toward the South at Sunne setting.

♃ Jupiter and ♀ Mercuri keepeth company with Kingly Sol.

♂ Mars looketh red south-west before the Sunne.

♀ Venus is still our glorious morning-starre.

## A Prognostication.

New Moone on tuesday the second day, 48 min. after iii. of the clocke in the morning, wette.

First Quarter on wednesday the x. day, 50. min. past vi. of the clocke in the morning, windy.

Full Moone on tuesday the xvi. day, 48. min. after vii. of the clocke at midnight, faire.

Last Quarter on tuesday the xxiii. day, 14 min. after vii. of the clock at night, seasonable.

### March.

♄ Saturne is south-east at Sunne setting.

♃ Jupiter is in the west at Sunne setting.

♂ Mars is south at Sun rising.

♀ Venus is in the east before the Sunne.

☿ Mercuri sets with the Sunne.

New Moone on wednesday the iii. day 13. min. past x. of the clocke at night, wet weather.

First Quarter on thursday the xi. day, halfe an hower after vi. of the clocke at night, greates windes.

Full Moone on thursday the xviii. day, 6. min. after ix. of the clocke in the morning, cold weather.

Last Quarter on wednesday the xxiii. day, 50. min. past x. of the clocke in the fore noone, frost.

### April.

♄ Saturne riseth when the Sunne setteth.

♃ Jupiter is South-west at Sunne setting.

♂ Mars is neere the South at Sunne rising.

♀ Venus riseth a little before the Sunne.

☿ Mercuri is traveling west at Sunne setting.

New Moone on friday the second day, 57 min. after two of the clocke in the afternoone, fayre.

First Quarter on saturday the x. day, 21 min. after iii. of the clocke in the morning, cloudy.

Full Moone on friday the xvi. day, 20. min. after vi. of the clocke at night, wet.

Last Quarter on saturday the xxiii. day at iii. of the clocke in the morning, wet.

May.

White. 1630.

May.

♄ Saturne is in the west at Sunne setting.

♃ Jupiter is in the west at Sun rising.

♂ Mars is neere the South at Sun rising.

♀ Venus shineth bright in the west after Sunne setting.

☿ Mercuri sets with the Sunne.

New Moone on Sunday the second day, 10 min. after v. of the clocke in the morning, close weather.

First Quarter on Sunday the ix. day, 16. min. past ix. of the clocke in the morning, faire.

Full Moone on Sunday the xvi. day, 22. min. after xiii. of the clocke in the morning, fayre.

Last Quarter on Sunday the xxiii. day, halfe an hower after ix. of the clocke at night, sweet shewers.

New Moone on Monday the xxxi. day 7. min. after v. of the clocke at night, windy.

June.

♄ Saturne is past the South at Sunne rising

♃ Jupiter is neere the South at Sunne setting.

♂ Mars is South east before the Sunne.

♀ Venus is south west at Sun set.

☿ Mercuri vndereth the Sunne in the morning.

First Quarter on Monday the vii. day, 42 min. after one of the clocke in the afternoone, temperate.

Full Moone on Monday the xiiii. day, 19. min. after xii. of the clocke after noone, fayre

Last Quarter on Tuesday the xxi. day, 49. min. after two of the clocke in the after noone, very hotte.

New Moone on Wednesday the xxv. day, 40 min. after two of the clocke in the morning, wet.

Julie.

♄ Saturne is full South at Sunne rising.

♃ Jupiter is south east at Sunne setting.

♂ Mars is South east at Sunne rising.

♀ Venus is south west at Sun set.

☿ Mercuri riseth a little betoze the Sun.

First

## A Prognostication.

**F**irst Quarter on Tuesday the vi. day, halfe an hower after vi. of the clocke at night, coole blasts.

**F**ull Moone on Wednesday the viii. day 4 min. past iii. of the clocke in the morning, cloudy.

**L**ast Quarter on Thursday the xlii. day, 7 min. after vi of the clocke in the morning, faire.

**N**ew Moone on Thursday the xlii. day 7. min. after x. of the clocke in the fore noone, faire.

### August.

**S**aturne and **J** Mars are South-east befoze the Sunne.

**J**upiter riseth at Sunne setting.

**V**enus and **M**ercuri are in the west at Sunne setting.

**F**irst Quarter on Thursday the v. day, 14. min. after one of the clocke in the morning, wet.

**F**ull Moone on Thursday the xli. day, 36. min. after vi. of the clocke at night, windy.

**L**ast Quarter on Friday the xx. day, at x. of the clocke at night, close weather.

**N**ew Moone on Friday the xxlii. day, 4 min. after vii. of the clocke at night, cold.

### September.

**S**aturne and **J** Mars are in the East befoze the Sun.

**J**upiter is in the west at Sunne rising.

**V**enus shineth in the west at Sunne setting.

**M**ercuri setteth with the Sunne.

**F**irst Quarter on Friday the third day, at xi. of the clocke at noone, faire.

**F**ull Moone on Saturday the xi. day, 32. min. after xi of the clocke at noone, wette.

**L**ast Quarter on Sunday the xix. day, 24 min. after x. of the clocke in the morning, cloudy.

**N**ew Moone on Sunday the xxvi. day, 22. min. after iii. of the clocke in the morning, wette.

### October.

**S**aturne, **J** Mars and **M**ercury riseth a little befoze the Sun.

**J**upiter is South west at Sunne rising

**V**enus is our bright Evening-star in the west after the Sun.

First

## White. 1630.

First Quarter on Saturday the second day, 45 min. after xii, of the clock at midnight, indifferent.

Full Moone on Monday the xi. day, 8. min. after xiii, of the clock in the morning, cold weather.

Last Quarter on Monday the xliii. day, 57. min. after ix. of the clock at night, wette.

New Moone on Monday the xrv. day, 42 min. after xii. of the clock at noone, twete.

## Nouember.

♄ Saturne, ♀ Venus and ♀ Mercuri sets a little after the Sun.

♃ Iupiter is past the South at Sunne rising.

♂ Mars setteth with the Sunne.

First Quarter on Monday the first day, 56. min. after v. of the clocke at night, windy and wet.

Full Moone on Tuesday the ix. day, 22 min. past ix. of the clocke at night, frost.

Last Quarter on Wednesday the xvii. day, 54 min. after vi. of the clocke in the morning, faire.

New Moone on Wednesday the xxiii. day, at two of the clocke in the morning, fayre.

## December.

♄ Saturne is South west at Sunne setting.

♃ Iupiter is toward the South at Sun rising.

♂ Mars riseth with the Sunne.

♀ Venus and ♀ Mercuri goe to bed after the Sunne.

First Quarter on Wednesday the first day, 55 min. after one of the clocke in the morning, wette.

Full Moone on Thursday the ix. day, halfe an hower after one of the clocke in the afternoone, windy.

Last Quarter on Thursday the xvi. day, 39 min. past two of the clocke in the afternoone, frost.

New Moone on Thursday the xxiii. day, 20 min. after one of the clocke in the afternoone, fayre.

First Quarter on Friday the xxxi. day, ix min. after xi. of the clocke at noone, frost.

Of three Eclipses of the Sunne and  
Moone, for this Yeare. 1630.

**T**he first Eclipse is of the Moone, and both happen vpon  
Sunday the sixteenth day of May: The beginning is at  
three of the clocke and 40. minuts in the morning: The middle  
at five and 45. minuts: And the end will be at six of the clocke  
and 20. minuts. From the beginning to the end, will be neere  
two howers and three quarters, before she recover her former  
borrowed light againe. And this Eclipse may be seene by vs of  
Great-Britaine, Ireland, and other parts of Europe.

The Sunne (the bright Eye of heauen) hideth his light and  
glory from vs the Earthes Inhabitants, vpon Monday the  
thirtie one of May: The beginning is at five of the clocke and  
22. minuts in the afternoone: The middle at six and 23. min.  
And the end will be at seven and 24. minuts: From the begin-  
ning to the end, will be about two howers: And then he will  
againe recover his light. This Eclipse may be seene by vs Chri-  
stians, as the other of the Moone.

The last Eclipse of the Moone is vpon the ninth day of No-  
uember at night. The beginning is at eight of the clocke and  
44 minuts: The middle is at ten and 27 minuts: And the  
end at twelue and 9 minuts: The whole duration is three how-  
ers and 25 minuts. And this Eclipse is to be seene by vs as the  
rest, if cloudes doe not hinder the same.

The beginning, continuance, and ending

## A Prognostication.

### The explanation of the former Table.

**N**Ote that ever King began his raigne, the same time that the next precedent King ended his.

If you desire to know how long it is since the beginning of the raigne of any King, looke how long it is since the ending of the precedent King, and there you shall finde your request.

As for example: If you would know when King Henry the 8 began his raigne, how long he raigned, and also how long it is since his raigne: find out first his name amongst the names of the Kings, and searching the row towards the right hand, you shall finde he began his raigne in the yeare 1509 the 22 of Aprill, and under the title of the time that he raigned, is 37 yeares, 10 months, and 1 day: And looking forward in the same row, where is 121 yeares, Aprill 22 under the title of since their raigne, and so long it is since he dyed.

### How to iudge what Weather will follow, by the rising and setting of the Sunne.

**T**he Sunne rising bright and cleare, signifieth a pleasant day: If he rise fiery red, it promiseth raine: If in his rising hee bee thicke overcast with a cloud, it betokeneth foule weather: If the Sunne drive the clouds before him into the West, it signifieth faire weather: If at his rising there appeare a circle about him, & banneth away equally, it betokeneth faire weather. Also, if he set fiery red, it signifieth faire weather: If at his setting he be of divers colours, or clouds like water, it threatneth raine. If at the rising of the Sun, his beames seeme red, or long, or compassed with red clouds, it signifieth great windes: If at his setting there appeare a thicke mist, or if it raineth in the evening, it threatneth very foule weather to follow. Also, if the Sunne beames be spotted eyther Greene, pale, or blacke, gathered to a cloud, it signifieth raine. The Sun setting cleare without any cloud, signifieth a faire night to ensue. If the circle, or circles about the Sun be cleare, & of no continuance, looke for faire weather: If there be many circles, it signifieth windes: the redder they are, the more vehement winds. If the circles are heere and there broken, and are thicke and blacke, looke for cold wind or snow: Or, if he settle behinde a great black cloud, raine followeth.

How

## How weather is foreknowne by the Moone.

If the Moone in the third day of her change, or thier dates before her full, or in the midst of the quarter, be found of pure light, nothing encompassing her, the ends direct vp, shee promiseeth fayre weather: but bent to red coloz, prouoketh winds. The Moone pale, or somewhat blacke or thicke, threatneth raine. When the Moone is five days old, marke the tips of her hornes, if they be blunt, it signifieth raine: if sharpe poynted and prickling bytriues, great winds. If in the fourth day after her change, she haue a red circle about her, it signifieth winds and raine.

## Of the iudgement of the weather by the Stars.

If the Starres appeare of much light, and seeme to be of more brightnes & blazing then ordinary, it betokeneth great windes & moysture in that part where they seeme to: and in Winter, great frostes. When comete Starres appeare with long fiery tayles, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also, when Starres seeme to shoot or fall, it signifieth great winds in that place: If they seeme to shoot in diuers places, it signifieth diuers winds: If in all places, winds, thunder, lightning, and most tempestuous weather.

## A short Instruction, and very necessarie to know the times and seasons when to Sow, and replant all maner of Seedes for the Garden.

**S**ow Cabbages in February, March, or April, in the Decline of the Moone: and replant them in the Decree.

Sow Cabbage-Leaues in February, March, or Iuly, in the old of the Moone.

Sow Onions and Leekes, in February or March, at the Decline of the Moone.

Sow Beetes in February or March, at a full Moone.

Sow

## A Prognostication.

**Sow Coleworts** white & greene, in the middle of August or September: Plant the young ones in October, and lett them againe in November.

**Sow Parsneps** in Februarie, Aprill, or June, in a fayre daye.

**Sow Radish** in Februarie, Aprill, or June, in the increase of the Moone.

**Sow Pumpions, Cucumberes, Melons, and Gourdes**, in February, March, or June, in a hott and fayre day.

**Sow Spinage** in Februarie or March, in the old of the Moone.

**Sow Parsely, Fennell, and Annis-seede**, in February or March at the full of the Moone.

**Sow white Cicory** in February, March, July, or August, in a full Moone.

**Sow Cardus-benedictus** in February, March, or May, when the Moone is old.

**Sow Baskill** in March, in an old Moone.

**Sow Purcelaine** in February, or March, in y<sup>e</sup> increase of y<sup>e</sup> moone.

**Sow Margoram, Violets, Time, Flower-gentle, Balsam, & Lauender**, in february, March, or Aprill, at the increase of the Moone.

**Sow Garden-cresses, and Rocket**, in February, at the increase.

**Sow Sauill** in February or March, at a new Moone.

**Sow Coxander, and Beage**, in February or March, at the Moones increase.

**Sowe Harts-horne, and Samphire**, in February, March, or Aprill, at an old Moone.

**Sow Gilliflowers, Hearts-case, and Wall-flowers**, in March or Aprill, in an old Moone.

**Sow Cardus, and Artichokes**, in March or Aprill, when the Moone is old.

**Sow Chick-weed**, in February or March, at the full of the Moone.

**Sow Barnet** in February or March, at an old Moone.

**Sow Bishop and Saueray** in March, when the Moone is old.

**Sow double Marigolds** in February or March, at the increase of the Moone.

**Sow Larkes-foote, Sparges, and Sperage**, in February, in an old Moone.

Sow

## A Prognostication.

Sow white Poppy, and Palma-Christi in February or March,  
at the increase of the Moone.

Sow all manner of Corne the Moone increasing, the being in  
Cancer, Libra, or Aquarius.

Sow or sow all kind of Seeds the Moone in Aries, Taurus, Can-  
cer, Virgo, Libra, Capricorne, Aquarius, or Pisces: but those  
Seeds whose Rootes are round, should be sowne three or  
fower dayes before, or after the full Moone.

---

### *Certaine and short Rules, for the comforting of the chiefe official Members of the Body of Man.*

Things which are good to comfort the Head.

**L**ignum-Aloes Marlowum, Calingale, Muske, Rosemary,  
Roses, Cammomell, Rue, Frankinsence, Nutmegs, Hyssop,  
Balme, Mints, Spike, and Claven.

Things good for the Eyes.

Fennell, Heruen, Cloues, Cold water, Celestina, Eybright, Ro-  
ses, and Agrimony.

Things good for the Stomacke.

Nutmegs, Cloues, Duganum, Corall, Saffron, Quinces,  
Mozmetwood Olibanum, Agrimony, Cametsy, Muske,  
Lignum-Aloes, Spodium, and Coriander prepared.

Things good for the Heart.

Saffron, Cloues, Sinamon, Mace, Nutmegs, Marlowum, Bur-  
rage, Buglosse, Rosemary, Mirabolanes, Pearles, Lignum-  
Aloes, Corall, Muske, and Betwell.

Things good for the Liuer.

Liuerwort, great Raysons, Mozmetwood, Agrimony, Saffron,  
Cloues, Endive, Violets, Fennell, Plantain, Dragons, Rose-  
water, Lettuce, Violets, Sanders.

Things good for the Lungs.

Licois, Raisons, Almonds, Dates, Lungwort, Maydenhaire,  
Lungwort, Elcompane, Pistaces, and Benedes.

**E**

*Things*

*Things hurtfull for the Body.*

Meates hurtfull to the Teeth.

**N**ettes, Meates very hot, warme drinke, Sweete meates and drinckes, Radish rootes, Hard meates, Bitter meates, Milke, much Vomiting, Leekes, Fatte of Fish, Coleworts, & Lemmons.

Things hurtfull to the Eyes.

Garlicke, Onions, Radish, Drunkenesse, Letcherie, Sweete and thicke Wines, Salt meates, Coleworts, all Pulse, Must, Wine, Dust, Smoake, Fire, and reading presently after supper.

*Rules of Mensuration.*

**A** Fingers bredth is foure Barly cornes in thickness; and an Inch thre Barly cornes in length: A hands bredth foure fingers: A span is thre hands bredth: A foot is foure hands bredth: A Geometrical Pace is five foot: an English Peache is xvi. foot  $\frac{1}{2}$ . A Furlong is a hundred, & twenty five paces, or six hundred, twenty and five foot: An English Furlong is six hundred and threescore foot, or a hundred thirtie two paces: A League is a thousand and five hundred paces: An Italian Mile is a thousand paces, or eight Furlongs: A common German Mile is thirty two Furlongs. An English Mile is eight Furlongs: An Acre is fortie Peaches in length, and foure in bredth.

*A short Instruction for the Table following.*

**N**ote that the first Columnne or Row, containeth the Names & number of Shires, the second of Cities, the third of Bishopricks, the fourth of Castles, &c. Now goe straight in a line, and you shall easily finde the number Alphabetically, aswell for the English as for the Welch shires: As for example, Buckinghamshire hath no Citie, no Bishopricke, 11. Market Townes, no Castles, 185. Parishes, &c.

A Catalogue of all the Shires, Cities, Bishop-  
rickes, Market-Townes, Castles, Parishes,  
Riuers, Bridges, Chases, Forrests, and Parkes,  
conteyned in euery particular Shire  
in the Kingdome of England.

11	8	48	19
12	9	36	18
13	10	24	17
14	11	12	16
15	12	0	15

The vse of this Table.

**S**eeke the age of the Moone in the Almanack, then looke the  
same in this Table, which you shall find either in the encrea-  
sing or decreasing, and then in the middle Colunne you shall  
without further labour find the time of her shining.

As for Example: Upon the 11 day of January, I would  
know how many Howers and Minutes the Moone shineth: I  
finde in the Kalender it is New Moone the 3 day, then reconing  
from thence to the 11 day, I find she is 8 daies old: Then entring  
this Table, it sheweth, she shineth 8 houers and 24 minutes:  
So is it likewise when she is 22 daies old, &c.

The explanation of a new and easie Kalender here following, for this present Yeare, 1630.

**N**Ote that every Moneth conteyneth three rowes by Columns, (the Figurers for the number of Dayes excepted) the first Columme toward the left hand conteineth the Weeke Dates and Sunday Letter. The second, the Signe wherein the Moone is every day. And the third, the Changes and Quarters of the Moone. Note that the being thus  figured doth signifie the new Moone: and placed thus  way is the first Quarter: This  the Full Moone; And againe this  the last Quarter. Note also, that the Figures ouer the head of the Moones, doe signifie the houre of her Changes; and the Letters underneath, the time after noone, or after midnight, N. standing for after noone till Midnight, and M. for after Midnight till Noone.

As for example, Against the 3 day of January, being Sunday, I doe finde the Moone in  $\nu$  Capricorne, and is thus  charactered, which is New Moone at 9 of the clocke in the Morning.

Againe, on the 10 day of February, being wednesday, I doe find the Moone in  $\text{II}$  Gemini, and is thus  figured, which is the first Quarter, at 7 of the clocke in the Morning. &c.

Note also, that at the head of every Moneth is placed the Rising and Setting of the Sunne for the middle of every Moneth: As for example, for the midst of January the  Sun riseth at 7 of the clocke, and 40 minutes; and setteth at 4 of the clocke and 20 minutes.

It also conteyneth (on the back side of the leafe) for every Moneth, the Holy-dayes, and Feasts, both Moueable and Im-moueable; with the beginning and ending of every Terme: As Easter-day is on the 28 day of March, Whitsunday on the 16 day of May: Terme begins on the 23. of January, and endeth on the 12 of February, &c.

A briete and easie Kalender for this Yeere  
 1630. which being cut out, is fit to be placed  
 into any Booke of Accompt, Table-booke, or  
 other, conteyning the whole Almanacke, in  
 a short method; By *John White.*
